

MARC LESTER BAGAL

Davao City, Philippines | github.com/bagalmarclester | University of Mindanao

PROFESSIONAL SUMMARY

Computer Science undergraduate at the University of Mindanao seeking a Software Development Internship. Experienced in front-end and mobile development with a portfolio spanning web applications, cross-platform mobile apps, and AI-powered systems using Gemma 4 LLM and NLP. Proficient in HTML, CSS, JavaScript, TypeScript, Python, React Native, and modern build tooling. Proven ability to take ownership of the user-facing layer, collaborate in teams, and deliver functional software across academic and personal projects.

EDUCATION

Bachelor of Science in Computer Science

University of Mindanao

Expected Graduation: 2027

Davao City, Philippines

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript, Python
Frontend: React Native (Expo), Vanilla Framework, Bootstrap, Responsive UI, Figma
Backend: Node.js, Laravel Blade, PHP, REST APIs, Vite
AI/ML: Gemma 4 (Pretrained LLM), NLP, Machine Learning, Jupyter Notebook
Tools: Git, GitHub, VS Code, Expo CLI, Expo Go, npm

PROJECTS

Gemma 4 AI Tutor App | *Personal Project*

Python, Gemma 4 LLM, NLP, Jupyter

- Built an AI-powered tutoring app using Google's Gemma 4 pretrained LLM for NLP-driven Q&A and educational dialogue.
- Structured with a core module and Jupyter notebooks demonstrating end-to-end LLM integration.

WeatherWise - Mobile Weather App | *Personal Project*

React Native, Expo, TypeScript, Node.js

- Cross-platform mobile weather app with component-based architecture (hooks, context, services, utils).
- Integrated live weather API through a dedicated server layer with custom state management.

OmniBus Bus Management System | *Personal Project*

TypeScript, Vite, Node.js, Gemini AI

- AI-powered bus management web app integrating the Google Gemini API with TypeScript and Vite.
- Full project setup with environment configuration and modern build tooling beyond standard coursework.

Business Management System | *Academic Project - Software Engineering*

HTML5, CSS3

- 12-page web system with modules for clients, employees, inventory, invoices, and quotes.
- Led full front-end development - layout, navigation, and visual design across all modules.

Tanaman Dabaw Operations Management System | *Collaborative Project*

Laravel Blade, PHP, HTML, CSS

- Contributed front-end views and UI components in a Laravel Blade MVC environment.
- Gained practical exposure to PHP-based server-rendered templating and team-based version control.

Wine Quality & Student Outcome Prediction | *Academic Project*

Python, scikit-learn, Machine Learning

- Two ML models for wine quality and student outcome classification using Python and scikit-learn.
- Applied data preprocessing, feature analysis, and model evaluation techniques.
